

The background of the entire page is a photograph of a desert landscape at night. The sky is dark and filled with numerous stars. In the distance, there are several large, rounded red rock formations. The foreground is a field of dry, yellowish-brown grass with scattered dark trees and shrubs.

We saw waterfalls on Uluru! 🌧️💧

-

Have you ever wondered what Uluru looks like when it's raining? After a storm, large quantities of water run off from the top of the rock and create these amazing waterfalls! I was lucky enough to witness this rare natural phenomenon during my recent visit to Uluru and the entire experience was unforgettable. We booked a tour with [@ulurusegwaytours](#) to get a closer look at the base of Uluru where we could stop to admire these jaw-dropping waterfalls. Due to the climate of the area, only 1% of visitors get to experience these conditions so definitely add this to your bucket list!
